

XML in Libraries

Roy Tennant, California Digital Library
roy.tennant@ucop.edu

AxKit

<http://axkit.org/>

Web publishing of XML using Perl.

Cocoon

<http://xml.apache.org/cocoon/>

Web publishing of XML using Java.

SWISH-Enhanced

<http://swish-e.org/>

Full-text indexing of documents (HTML, text, PDF, XML, etc.).

Tomcat

<http://jakarta.apache.org/tomcat/>

A Java servlet container (something like this is required to run Cocoon).

XML in Libraries

<http://www.neal-schuman.com/db/0/290.html>

My book on applications of XML in libraries.

XML.com

<http://xml.com/>

An information portal on XML run by the publisher O'Reilly & Associates, Inc.

XML.org

<http://xml.org/>

An information portal on XML run by an industry group, OASIS.

XML4Lib

<http://sunsite.berkeley.edu/XML4Lib/>

The electronic discussion for librarians using XML.

XSLT Reference

<http://www.zvon.org/xxl/XSLTreference/Output/>

What it sounds like.

XSLT Tutorial

<http://www.zvon.org/xxl/XSLTutorial/Books/Book1/>

Ditto.

xsltproc (and dependencies)

<http://xmlsoft.org/XSLT/>

An XML processor (for use with XSLT).
